

## Advanced Non-Verbal Presentation Skills with Michael Grinder, world renown expert in non-verbal communication

For the first time in Perth, Michael Grinder will be sharing his latest breakthrough: the fastest sequence to mastering the skills to persuade and inspire others.

Speaking in front of people is a fantastic opportunity to influence people's thinking and behaviours. And, at the same time, people say that presenting is their biggest public fear.

What is the difference between those that welcome the opportunity and those that don't? SKILLS – knowing how is what relaxes presenters.

Whether you are a presenter or attending a committee/board meeting do you know HOW to be perceived as intelligent? How to be someone that people respect and want to follow?

**Since 82% of communication involves non-verbals, you will walk away with:**

- Identify when to make eye contact and when not to;
- Understand the actual differences of both stand-up and sit-down styles;
- Realise the effect between oral and visual presentations;
- Know how to posture your body – including your all-important gestures;
- Understand the two most effective voice patterns, credible and approachable, and when to use each; and
- Discover the role of gestures and how they impact your message.

This program is designed for keynoters, trainers, committee chairpersons, board members, managers, and if you coach others – these skills are a MUST.

*Michael Grinder is a world renown expert in non-verbal communication. His humor and insight creates a safe and yet challenging learning environment. The format is one-third conceptual, one-third demonstration and one-third role-play (reality rehearsal).*
